Subject: Lake Spokane Water Quality

Dear Sirs:

I live in Suncrest and am very concerned about the quality of water that we use as recreation for our children. It is time for common sense to prevail over money. The commercial enterprises and municipalities that continue to get away with violations that negatively effect our water quality must be stopped. We have to live with their polutants every day.

Please be stronger in dealing with the violators. The city of Spokane needs to be held accountable.

Let me know if there is something I can do to help.
